

SUPPLEMENTARY FIGURE 1 – GST pulldown between histidine-tagged chimera (-) and GST-tagged Vps4 in the presence or absence of ATP-Mg²⁺. (A) Blot with anti-histidine tag antibody to visualise chimera (-). (B) Blot with anti-GST tag antibody to visualise Vps4. The successful binding of chimera (-) to Vps4 would be shown by chimera (-) bands appearing in lane 2 and 3 in (A).
