ESM Table 1. The mutant strains used for forming the heterokaryons and diploids in Figure 3 and 5.

Strain	Original strain (See Table 2)	Azole-resistance level (based on the MIC to difenoconazole)	Nitrate utilisation marker	Spore colour
SCW	CBS 140053	Sensitive(S) MIC(D)=2	cnx	White
SNG	CBS 140053	Sensitive(S) MIC(D)=2	nia	Green
ING	CBS 140053-D3-7B	Intermediate(I)MIC(D)=8	nia	Green
RNG	CBS 140053-D1-7	Resistance(R)MIC(D)=32	nia	Green
