

ANDREW LANG

Bibliography

Andrew Lang's publications

- Vand V., Lomer T.R. & Lang A.R. (1947). *Nature*. **159**, 507-508. *Crystal structure of a crossed-chainpotassium soap.*
- Vand V., Lomer T.R. & Lang A.R. (1949). *Acta Cryst.* **2**, 214-220. *The Crystal Structure of Form A of Potassium Caprate.*
- Wooster W.A., Ramachandran G.N. & Lang A.R. (1949). *Rev. Sci. Instrum.* **25**, 405-407. *A note on the use of X-ray counter spectrometers for single crystal measurements.*
- Wooster W.A., Ramachandran G.N. & Lang A.R. (1949). *Rev. Sci. Instrum.* **26**, 156-157. *A new bent-crystal monochromator.*
- Lang A.R. (1951). *Nature*. **168**, 907-908. *The proportional counter in X-ray diffraction work.*
- Lang A.R. (1952). *J. Sci. Instrum.* **29**, 176-178. *A printing recorder for use in conjunction with scaling units.*
- Lang A.R. (1952). *Proc. Phys. Soc. A*. **65**, 372-373. *Wavelength resolution of X-ray proportional counters.*
- Lang A.R. (1953). *Proc. Phys. Soc.*, **56**, 1003-1008. *Extinction in X-ray diffraction patterns of powders.*
- Lang A.R. (1954) *Acta Cryst.*, **7**, 583-587. *A new photographic method for studying the texture of large single crystals.*
- Lang A.R. (1954). *Rev. Sci. Instrum.* **25**, 1032-1033. *A proposed method for electronic intensification of single-crystal X-ray diffraction images.*
- Lang A.R. (1954). *Rev. Sci. Instrum.* **25**, 1039-1040. *Suggested necessary conditions for successful use of the stationary-crystal integrated reflection measuring method with the counter spectrometer.*
- Atwater H.A., Lang A.R. & Chalmers B. (1955). *Can. J. Phys.* **33**, 362-353. *Some observations of surface phenomena appearing on lead single crystals.*
- Lang A.R. (1955). *Rev. Sci. Instrum.* **26**, 680-689. *Focusing transmission specimen technique for the X-ray diffractometer.*
- Lang A.R. (1956) *Acta Cryst.*, **9**, 436-445. *An X-ray Study of α -Keratin. I. A General Diffraction Theory for Convolute Chain Structures and an Approximate Theory for Coiled-Coils.*
- Lang A.R. (1956) *Acta Cryst.*, **9**, 446-451. *An X-ray Study of α -Keratin. II. Diffractometer measurements of the complete diffraction pattern of Canadian porcupine quill.*
- Lang A.R. (1956). *Rev. Sci. Instrum.* **33**, 138-141. *A versatile X-ray diffractometer for single crystal and powder studies.*
- Lang A.R. (1956). *J. Appl. Phys.* **27**, 485-488. *Effect of dispersion and geometric intensity factors on X-ray back-reflection line profiles.*
- Lang A.R. (1956). *Rev. Sci. Instrum.* **27**, 17-25. *Diffracted-beam monochromatization techniques in X-ray diffractometry.*
- Lang A.R. (1956). *Rev. Sci. Instrum.* **33**, 96-102. *Some notes on the design and performance of X-ray proportional counters.*
- Lang A.R. & Broad D.A.G. (1956). *Brit. J. Appl. Phys.* **7**, 221-226. *Electron optics of X-ray tubes*

and the design of unbiased sharply-focusing cathodes.

- Lang A.R. (1957). *Acta Met.*, **5**, 358-364. *A method for the examination of crystal section using penetrating characteristic X radiation.*
- Lang A.R. (1957) *Acta Cryst.*, **10**, 252-254. *The Study of Multiple Reflections with the Aid of a Microfocus X-ray Source.*
- Lang A.R. (1957). *J. Appl. Phys.* **28**, 497-498. *On the origin of certain spirals of large step-height observed on crystal surfaces.*
- Lang A.R. (1958). *J. Appl. Phys.*, **29**, 597-598. *Direct observation of individual dislocations by X-ray diffraction.*
- Frank F.C. & Lang A.R. (1959). *Phil. Mag.*, **4**, 383-384. *Observation by X-ray diffraction of dislocations in diamond.*
- Kato N. & Lang A.R. (1959). *Acta Cryst.*, **12**, 787-794. *A Study of Pendellösung Fringes in X-ray diffraction.*
- Lang A.R. (1959). *Acta Cryst.*, **12**, 249-250. *The projection topograph. A new method in X-ray diffraction micrography.*
- Lang A.R. (1959). *J. Appl. Phys.* **30**, 1748-1755. *Studies of individual dislocations in crystals by X-ray diffraction microradiography.*
- Lang A.R. & Meyrick G. (1959). *Phil. Mag.*, **4**, 878-880. *Dislocation structures observed in high purity recrystallized aluminium by X-ray diffraction.*
- Hart M. & Lang A.R. (1961). *Phys. Rev. Lett.*, **4**, 120-121. *Direct determination of X-ray reflection phase relationships through simultaneous reflection.*
- Jenkinson A.E. & Lang A.R. (1962). *In* Direct observation of imperfections in crystals. Ed. J.B. Newkirk and J.H. Wernick, Interscience, New York, 471-495. *X-ray diffraction topographic studies of dislocations in floating zone grown silicon.*
- Polcarová M. & Lang A.R. (1962). *Appl. Phys. Lett.*, **1**, 13-15. *X-ray topographic studies of magnetic domain configurations and movements.*
- Lang A.R. (1963). *In* Encyclopedia of X-rays and gamma rays, G.L. Clark (ed.), Rheinhold Publishing Co., New York, 1053-1063. *Topography, X-ray diffraction in dislocation studies.*
- Lang A.R. (1963). *Brit. J. Appl. Phys.*, **14**, 904-907. *Applications of "limited projection topographs" and "direct beam topographs" in diffraction topography.*
- Lang A.R. (1963). *J. Phys. Soc. Jap.*, **18**, 332-335. *Recent studies of lattice defects by X-ray diffraction topography.*
- Miuscov V.F. & Lang A.R. (1963). *Kristallografiya*. **8**, 652-666. *X-ray topographic study of magnesium oxide crystals.*
- Shah C.J. & Lang A.R. (1963). *Miner. Magazine*. **33**, 594-599. *An unusual distribution of precipitates in a diamond.*
- Authier A. & Lang A.R. (1964). *J. Appl. Phys.* **35**, 1956-1959. *Three-dimensional x-ray topographic studies of internal dislocation sources in silicon.*
- Lang A.R. (1964). *Proc. Phys. Soc.*, **84**, 871-876. *A proposed structure for nitrogen impurity platelets in diamond.*
- Lang A.R. (1964). *Disc. Faraday Soc.*, **38**, 292-297. *Crystal growth and crystal perfection: X-ray*

topographic studies.

- Lang A.R. (1964). Proc. Roy. Soc. A. **278**, 234-242. *Dislocations in diamond and the origin of trigons.*
- Lang A.R. & Miuscov V.F. (1964). Phil. Mag., **10**, 263-268. *Dislocations configurations in magnesium oxide observed by X-ray topography.*
- Takagi M. & Lang A.R. (1964). Proc. Roy. Soc. A. **281**, 310-322. *X-ray Bragg reflection, "spike" reflection and ultraviolet absorption topography of diamonds*
- Authier A., Rogers C.B. & Lang A.R. (1965). Phil. Mag., **12**, 547-560. *On the macroscopic distribution of dislocations in single crystals of high-purity recrystallized aluminium.*
- Frank F.C. & Lang A.R. (1965). Phys. Properties of Diamond. Ed. R.Berman, 69 -115. *X-ray topography of diamond.*
- Hart M. & Lang A.R. (1965). Acta Cryst., **19**, 73-77. *The influence of X-ray polarization on the visibility of Pendellösung fringes in X-ray diffraction topographs.*
- Kamiya Y. & Lang A.R. (1965). J. Appl. Phys., **36**, 579-587. *X-ray diffraction and absorption topography of synthetic diamonds.*
- Kamiya Y. & Lang A.R. (1965). Phil. Mag., **11**, 347-356. *On the structure of coated diamonds.*
- Lang A.R. (1965). Acta Cryst., **19**, 682-682. *An explanation of the fringes on Berg Barrett topographs reported by Armstrong and Schultz.*
- Lang A.R. (1965). Z. Naturforsch. (a). **20**, 636-638. *X-ray topographic determination of the sense of pure screw dislocations.*
- Lang A.R. (1965). Appl. Phys. Lett., **7**, 168-170. *Mapping Dauphiné and Brazil twins in quartz by X-ray topography.*
- Lang A.R. (1965). Acta Cryst., **19**, 290-291. *On the orientation of the Miller-Bravais axes of alpha-quartz.*
- Lang A.R. & Miles G.D. (1965). J. Appl. Phys., **36**, 1803-1807. *X-ray topography of decorated dislocations in magnesium oxide.*
- Lang A.R. & Miuscov V.F. (1965). Appl. Phys. Lett., **7**, 213-216. *Angström scale displacements revealed by X-ray Moiré topographs.*
- Lang A.R. & Polcarová M. (1965). Proc. Roy. Soc. A. **285**, 297-311. *X-ray topographic studies of dislocations in Iron-Silicon alloy single crystals.*
- Lawn B. & Kamiya Y., Lang A.R. (1965). Phil. Mag., **12**, 177-189. *An X-ray topographic study of planar growth defects in a natural diamond*
