

a Orientation of head: (0) orthognathous; (0) absent; (1) present.  
 b Orientation of head: prognathous or slightly inclined: (0) absent; (1) present.  
 e Subgenital ridge: (0) absent; (1) present  
 f Interantennal ridge: (0) absent; (1) present  
 g Epitomal ridge: (0) present; (1) absent or incomplete  
 h Occipital ridge: (0) absent; (1) complete or partially developed  
 j Clypeus: (0) not subdivided; (1) subdivided into ante- and postclypeus  
 k Adult mouthparts: (0) with function; (1) without function  
 l Insertion of antennae: (0) close to the anterior mandibular articulation; (1) distinctly separated from the anterior mandibular articulation  
 m Anterior and posterior tentorium: (0) separated; (1) merged  
 p Wing-like processes of the anterior tentorial apodemes extending into the lumen of the mandibular base: (0) absent; (1) present  
 r M. tentoriofrontalis posterior (0te1): (0) present; (1) absent  
 s M. posteriorientorialis (0te4): (0) present; (1) absent  
 t M. tentorioentorialis longis (0te5): (0) present; (1) absent  
 u M. tentorioentorialis brevis (0te6): (0) present; (1) absent  
 x Anterior mandibular joint: (1) channel-joint; (0) absent; (1) present.  
 y Anterior mandibular joint: (2) ball-and-socket joint; (0) absent; (1) present.  
 z Anterolateral part of the anterior mandibular articulation (paratentorial joint): (0) present; (1) absent  
 aa Posterior mandibular joint: (0) cylinder-shaped (1) ball-and-socket joint  
 bb M. craniomandibularis externus anterior (0md2): (0) present; (1) absent  
 cc M. hypopharyngomandibularis (0md4): (0) present; (1) absent  
 dd M. tentorio-mandibularis lateralis superior (0md5): (0) present; (1) absent  
 ee M. tentorio-mandibularis medialis superior (0md7): (0) present; (1) absent
